This space is dedicated to your opinion and sometimes to our opinion, too.
We think it is good to interact with artists, to know their needs and their worries, and maybe also their success.
So please tell us,

if you feel so, your opinions about art, about your live as an artist, about the world of art, about this contest, even about us, about possibilities and about whatever you think it should be shared and others and especially fellow artists should know.
Please feel free to write us, preferably in English, but also in your language.
We will provide a translation. **We are curious!**
